Course Objectives	The aim of the course is, introduce normal-abnormal behavior and its biological bases. Genetically, endocrinological and neurological aspects of human behavior. Introduce the complex of biological and environmental impacts. Abnormal behavior such as delinquent behavior, aggressiveness and its biological impacts.
Course Learning Outcomes	<ul style="list-style-type: none"> • Describe the term normal • Describe crime and its biological impacts • Explain the neurological, endocrinological and genetical reasons of crime • Describe biological threshold. • Describe the biological reasons of behavioral variety • Describe the biological reasons of unwanted behavior
Course Contents	As the word Socialism (normal - normal) may seem like the opposite of socialism has nothing to do with any ideology. Sociability can result from professional status. One or two examples may be wrong to restrict sociability. They may exhibit anti-social behavior and attitudes in the private lives of people who are extreme in their daily life and social activities as well as psychological heritage. Another factor that can be considered the most important factors in addition to this is a misconception arising from the relationship of people with human sociability. This section can also be called upon to be isolated from society.
